Majestic Crystal Fountain Pen Kit

Code: 210137

WHAT'S REQUIRED

Bushing Set:
210141

Drill Bit Size:
15/32" and 37/64"

Minimum Blank Size:
22 mm x 22 mm x 127 mm

PREPARING THE BLANKS, HINTS & TIPS

Preparing a wooden or acrylic/polyester blank for a pen mandrel.

1. Cut a blank to the length of each tube plus approximately 2.5mm to allow for trimming and squaring off the ends.
2. Mark the centre on the end of the blank.
3. Using the recommended drill bit, drill a hole lengthwise through the blank.
4. Apply epoxy glue, Polyurethane glue or gap filling cyanoacrylate (super glue) to the tubes.
5. Insert the tube into the blank with a twisting motion to spread the glue evenly inside the hole.

6. Centre the tube lengthwise inside the blank.
7. Allow the adhesive to cure.
8. When cured, square the ends of the blank. Using a barrel trimmer with a guide matching the inner diameter of the tube or a universal pen blank squaring jig with a disc sander.
9. Take the excess material down flush with the ends of the brass tube. (do not trim beyond the length of the tube since this may interfere with operation of the mechanism and assembly).

Tips/Hints

- If using a wooden blank, draw a short pencil line lengthwise across the centre of the blank. This will help maintain grain alignment when mounting the blanks onto a mandrel.
- Excessive pressure may cause the drill bit to wander and/or split the blank. Slow the feed rate and back the drill bit out repeatedly for chip removal.
- Roughen the brass tube slightly with abrasive for better adhesion.
- Certain acrylic blanks are more transparent than others, especially lighter colors or blanks with light colored swirls. To avoid the risk of the brass tube showing through the pen blank, paint the tubes white or black before gluing them in.
- The barrel trimmer guide also cleans any adhesive that may have gotten inside of the tube.

TURNING THE BLANK, HINTS & TIPS

1. Mount the bushings and blank onto a pen mandrel according to the diagram.
2. Secure the bushings and blank onto the mandrel.
3. Slide the tailstock with a live centre into place against the mandrel and lock in position. This is for support; only slight pressure is required.
4. Using sharp tools, turn the blank down to become the Pen Barrel with the profile of your choice.
5. Turn the blank very slightly oversize, then sand and polish the ends down to the same diameter as the bushings.
6. Using successively finer abrasives gradually sand and polish the Pen Barrel.
7. Finish the Pen Barrel with your preferred choice of polish.

Tips/Hints

- Don't be afraid to sharpen frequently especially when turning acrylics.

Continues over...

ASSEMBLY, HINTS & TIPS

1. Layout parts according to diagram A, ensuring the turned Barrels are the same orientation as when mounted on the mandrel.

Hint: When removing the blanks from the mandrel, mark the inside of each tube where they join to maintain grain alignment, if using a wooden blank, during assembly.

2. Press the Centre Band assembly into the bottom of the 'shorter' Upper Pen Barrel.

3. Press the End Cap/Clip assembly into the top of the 'shorter' Upper Pen Barrel.

4. Press the Coupler into the bottom of the 'longer' Lower Pen Barrel.

5. Press the Top Cap into the top of the 'longer' Lower Pen Barrel.

6. Push the Refill, narrow end in first, into the back of the Nib Assembly. (Alternatively, fit the Refillable Ink Reservoir).

7. Push gently to break the seal then press lightly to advance the ink forward.

8. Screw the Nib Assembly into the Coupler.

Note: When engaging the ends to close the pen, notice the threads have three starting points so you can quickly close the pen in either of three positions.

Tips/Hints

- Use a woodworking vice, one handed bar clamp, arbor press or a dedicated pen press.
- Press parts together slowly and steadily
- When pressing the parts together, CHECK the parts are correctly aligned with each other and straight. If the part is crooked or misaligned, it will result in a poor fit.
