## Product use

Liberon Beeswax is ideal for nourishing absorbent woods such as pine and oak, especially when they are unsealed, or for use on items that have been dipped for stripping. A natural protector of wood it guards against dryness and is particularly suitable for small surfaces and furniture.

## Preparation

Remove old waxes and dirt with Liberon Wax and Polish Remover if necessary. Ensure the surface is clean, dry and free from dust.

## Application

Apply a coat of Liberon Beeswax sparingly with a soft, lint-free cotton cloth or Liberon Ultra Fine Steel Wool (grade 0000). Allow to dry for 30 minutes or until touch dry and then buff with a clean cotton cloth, Liberon Wax Polishing Brush or Liberon Drill Brush. Repeat the operation on new or very dry wood as it may require two or more coats. For a higher sheen build-up with thin coats of Beeswax, buffing between coats. Buff with a Liberon Furniture Brush or Drill Brush once the last coat has completely dried.

**Important:** Always test product first on a spare surface or inconspicuous area to check colour, compatibility and end results.

## Cleaning and maintenance

Wipe over with a cloth or duster and re-wax as required, when the surface looks dull and tired. Do not wash with water.

## Precautions

- Not suitable for high water areas such as kitchens and bathrooms. We recommend the use of Liberon oils or varnishes in these areas.

**Colours:** Clear

## Packaging

Liberon Beeswax Paste is available in 150cc

## Health and Safety

Irritant: contains turpentine. May produce an allergic reaction. Flammable. May cause skin sensitisation by skin contact. Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment. Repeated exposure may cause skin dryness or cracking. Keep out of the reach of children. Avoid contact with skin. Do not empty into drains. Wear suitable gloves. Use only in well-ventilated areas. If swallowed, do not induce vomiting; seek medical advice immediately and show this container or label.
